

Invoice format Pa for private

The **PA invoice** format will also be used for electronic private invoicing. The new system will allow the transmission from 1st January 2017. The format will always be an unique XML path, and always with the Interchange System (SDI), which is also available for commercial relations between individuals, as foreseen by the D. lgs. n. 127/2015. The **electronic invoice** is a traditional invoice instead of being written on paper is produced in digital format as it could be for example a pdf file. The innovation of this bill, is not only in size but also in being able to guarantee the authenticity and integrity of its content by the time of issue at the end of the electronic storage that is 10 years, through the inclusion of digital signature and time stamping. To allow the exchange of electronic invoices of private, the Tax Agency will make available to all taxpayers, a free service similar to SDI, Interchange System created for the AP invoice, which will allow the generation and transmission of electronic invoices . Then for some types of taxpayers, which will later be identified by a specific decree, the Agency will also provide the e-storage service.
